@NAME@ is a @AGE@ @SEX@ with a history of \*\*\* here today for rheumatologic evaluation of \*\*\*.

## **FIRST VISIT**

Began \*\*\*

[or Disease duration: \*\*\*]

\*\*\*history of dactylitis/swelling of whole digit
\*\*\*history of tendon or bursa inflammation

\*\*\*back and/or neck pain

## Psoriasis history:

Diagnosed in \*\*\*

Disease duration: \*\*\*
Nail involvement: \*\*\*
Areas of involvement: \*\*\*

Treatments to date have included \*\*\*

#### Treatments to date:

NSAIDS: \*\*\*

Oral DMARDs: \*\*\*
Biologic DMARDs: \*\*\*
Physical therapy: \*\*\*

## Social Hx:

Smoking: \*\*\* Alcohol: \*\*\* Work: \*\*\*

<u>Family Hx:</u> \*\*\*history of psoriasis or psoriatic arthritis, ankylosing spondylitis, inflammatory bowel disease, or uveitis. No other known history of autoimmune disease in the family. \*\*\* history of cardiovascular disease in the family.

Labs: \*\*\*RF, \*\*\*CCP, \*\*\*HLA-B27

## **HISTORY OF PRESENT ILLNESS**

Joints involved: \*\*\*

\*\*\*min morning stiffness

\*\*\*pain

\*\*\*swelling

\*\*\*NSAID use

Exercise: \*\*\*

- \*\*\*Psoriasis
- \*\*\*Itch
- \*\*\*Palms (area) of involvement
- \*\*\*Areas of involvement (scalp, inverse, genital)
- \*\*\*How much topical use
- \*\*\*How happy are you with your current involvement?

#### **REVIEW OF SYSTEMS:**

- \*\*\*Redness or pain in the eyes
- \*\*\*Diarrhea, constipation, blood in the stool
- \*\*\*Medication side effects
- \*\*\*Recent infections
- \*\*\*Depression or Anxiety

Remainder negative in detail.

#### **Health Maintenance:**

Vaccinations: \*\*\* influenza, \*\*\* pneumovax, \*\*\*TDAP

@imm@ PPD: \*\*\*

No change in social history or family history.

## **PAST MEDICAL HISTORY:**

@PROBLIST@

#### **MEDICATIONS:**

@CMEDLIST@

## PHYSICAL EXAM:

@VITALSM@

In general, \*\*\*the patient appears in no distress.

HEENT: \*\*\*eyes are anicteric and without injection, \*\*\*OP clear and without erythema. \*\*\*no thrush. The salivary pool is \*\*\*normal and tear meniscus is \*\*\*normal. \*\*\*No redness, fissuring, or dryness of the tongue.

Neck: supple, \*\*\*no thyromegaly, \*\*\*the submandibular glands are normal

Lymphatic: \*\*\*no lymphadenopathy in the anterior/posterior cervical chains, supraclavicular or posterior auricular nodes.

CV: \*\*\*Regular rhythm and rate, normal S1/S2, \*\*\*no murmurs, rubs or gallops

Pulm: \*\*\*Clear to auscultation bilaterally, symmetrical breathing, \*\*\*no

wheezes/crackles/rhonchi, no rubs

Ext: \*\*\*no clubbing or cyanosis. \*\*\*no edema

Neuro: alert and oriented, \*\*\*non-focal

Psyc: \*\*\*normal affect, insight and judgment

#### Psoriasis/Skin Exam:

Psoriasis subtype = \*\*\*

Psoriasis: PGA: Erythema (0-5) \*\*\*; Induration (0-5) \*\*\*; Scale (0-5) \*\*\*

BSA: \*\*\* Nails: \*\*\*

{Psoriasis Type:108052}

#### **MUSCULOSKELETAL EXAM:**

TMJ: \*\*\*

Hands: \*\*\*. \*\*\* Heberdon's/Bouchard's nodes.

Wrists: \*\*\* Elbows: \*\*\*

Shoulders: \*\*\*, AC joint \*\*\* Sternoclavicular joints: \*\*\* Hips: \*\*\*, \*\*\* Patrick's/FABER, \*\*\* SI joint tenderness

Knees: \*\*\*

Ankles: \*\*\*, \*\*\* posterior tibial tendons, \*\*\* peroneal tendons

Feet: \*\*\*

Spine: \*\*\*nontender, \*\*\*normal ROM on lateral bending, \*\*\*normal cervical ROM

Modified Schober's: \*\*\* cm

Occiput to Wall: \*\*\*

Tender Joint Count total: \*\*\* (0-68)

(MCPs, PIPs, DIPs, wrists, elbows, shoulders, SCM, AC, TMJ, hips, knees, ankle, midfoot/tarsus, MTP, Toe PIPs)

Swollen Joint Count total: \*\*\* (0-66)

(MCPs, PIPs, DIPs, wrists, elbows, shoulders, SCM, AC, TMJ, knees, ankle, midfoot/tarsus, MTP, Toe PIPs)

<u>Entheses</u>: \*\*\* lat epicondyles, \*\*\*med epicondyles, \*\*\*supraspinatus insertion, \*\*\*greater trochanter, \*\*\* quad tendon insertion, \*\*\* med femoral condyle, \*\*\*patellar ligament, \*\*\* Achilles, \*\*\* plantar fascia

Enthesitis: {Psoriasis Enthesitis:21514}

Dactylitis Count: \*\*\* (0-20)

Active features: \*\*\*peripheral joints, \*\*\*dactylitis, \*\*\*enthesitis, \*\*\*spine, \*\*\*nail disease, \*\*\*skin.

## Physician Global Assessment:

Overall PsA (0-100): \*\*\*

# Skin Static Physician Global Psoriasis (sPGA)

Rate the patient's PSORIASIS and how it affects him/her today. Check one appropriate response from the following options.

□ 0 = Clear	No signs of psoriasis. Post-inflammatory hyperpigmentation may be present.
□ 1 = Almost	Normal to pink coloration of lesions; no thickening; no to minimal focal
Clear	scaling
□ 2= Mild	Pink to light red coloration; just detectable to mild thickening; predominantly fine scaling.
□ 3 = Moderate	Dull bright red, clearly distinguishable erythema; clearly distinguishable to moderate thickening; moderate scaling.
☐ 4 = Severe	Bright to deep dark red coloration; severe thickening with hard edges; severe/coarse scaling covering almost all or all lesions.

# Patient Reported Outcomes RAPID3:

FN - Functional Status: \*\*\*

PN - Pain: \*\*\*

GL - Global Status: \*\*\*

Rapid3 Total: \*\*\*

(Options for Patient Reported Outcomes: note about PROs used in Rheumatology – PSAID, RAPID3, Patient Global, Patient Pain Assessment and Dermatology- simple questions about how happy are you with your psoriasis? These may best be collected before patients enter the room)

\*\*\* Labs

\*\*\*CRP, CBC, CMP

\*\*\* Imaging

#### **ASSESSMENT: \*\*\***

Since last visit, disease activity in the psoriatic arthritis is \*\*\*improved, unchanged, worsened and disease activity in the psoriasis is \*\*\*improved, unchanged, worsened.

**PLAN**: \*\*\*

Psoriatic Arthritis Management: \*\*\*

(Note: MDA/VLDA includes ≤1 swollen joints, ≤1 tender joints, ≤1 entheses, ≤3% BSA or PASI≤1, HAQ<0.5, Patient Global <20/100, Patient Pain <15/100)

Laboratory Monitoring for Disease Activity and Medication Toxicity: \*\*\*

Psoriasis Management: \*\*\*

T2T NPF: BSA 0-3% mild, 3-10% moderate, >10% severe

Where 1% is 1 of the patient's palms

#### Comorbidities

Cardiovascular Risk in Inflammatory Arthritis: \*\*\*

(Address lipid screening, smoking, risk factors such as hypertension, diabetes, family history, obesity)

Hypertension Screening: \*\*\*

(Note: most recent guidelines suggest that a healthy blood pressure is 120/80 and hypertension begins at 130/80)

Bone Health: \*\*\*

(osteoporosis screening per USPSTF guidelines, note that patients with RA and PsA are at increased risk for fracture and take axial disease, glucocorticoid use and menopausal status into consideration)

## Health maintenance:

Exercise and Stretching: \*\*\*

(consider 2018 EULAR physical activity recommendations)

Vaccinations: \*\*\*

(Consider ACIP and/or IDSA recommendations for vaccination of immunocompromised patients; in particular, pneumonia vaccination, influenza vaccination, killed shingles vaccination, TDAP)

TB Screening: \*\*\*

(TB screening recommended before therapy change and yearly by some organizations)

Additional screening prior to therapy: \*\*\*

(Consider check HBV SAb, HBV SAg, HBV CoAg, HCV Ab)

Follow up in \*\*\*
